WebViewer - Next.js sample

[WebViewer](#) is a powerful JavaScript-based PDF Library that's part of the [PDFTron PDF SDK](#). It provides a slick out-of-the-box responsive UI that interacts with the core library to view, annotate and manipulate PDFs that can be embedded into any web project.

This repo is specifically designed for any users interested in integrating WebViewer into a Next.js project. With the source code access, it gives developers full control to customize & style the UI, build custom controls & logic, integrate into workflows, or build a UI from scratch.

Demo

You can explore all of the functionality in our [showcase](#).

Initial setup

Before you begin, make sure your development environment includes [Node.js](#).

Project setup

```
npm install
```

Compiles and hot-reloads for development

```
npm start
```

Compiles and minifies for production

```
npm run build
```

Lints and fixes files

```
npm run lint
```

API documentation
